W (width, mm)	D (depth, mm)	h (worktop height, mm)
1.800	600	
2.100	750	900
2.400	900	750

MAX Load 200 Kg

Accessories and attachments such as electrical trunking brackets, side and back covers, or on demand new designs, can be attached at back beam and back legs nuts.

Primary Bench can be configured with appliances, check Primary Bench sheet for more info.

Main frame fully welded steel, epoxy coated 9010 (check other options) with M5 nuts below worktop (back beam) and M6 at back legs for accessories and attachments.

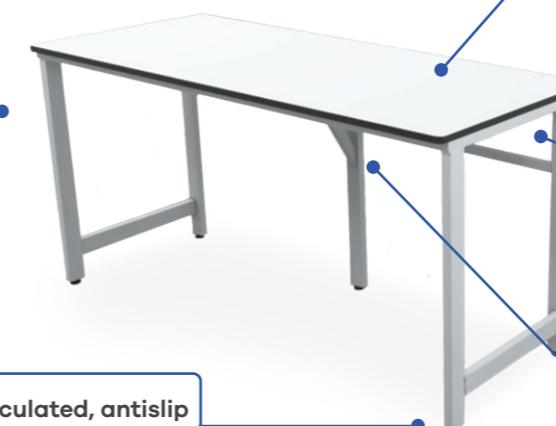

Worktop material on demand. Advised HPL 16 mm high chemical resistance.

Feet, articulated with rubber base.

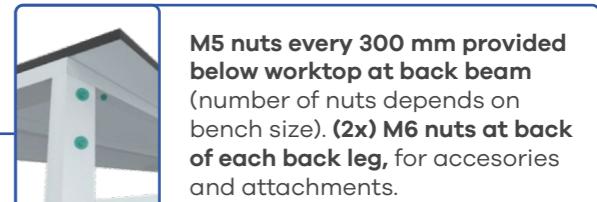

Main frame built with **thin and stylish tubing** to maximize leg space and clean spaces, while keeping aesthetics compatibility with IBR WorkStations.

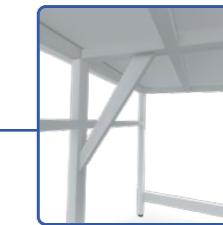

Some examples of **worktop materials**.

Articulated, antislip leveling feet.

M5 nuts every 300 mm provided below worktop at back beam (number of nuts depends on bench size). (2x) M6 nuts at back of each back leg, for accessories and attachments.

Extra post and middle strut reinforce the set at the middle of the wide span.

Primary Benches can also conform islands and peninsulas on their own. Wider islands can be arranged with Primary Bench 5P, having a bigger worktop area for lighter tasks that requires more space.

Primary Bench goes perfect for a **traditional approach in fixed positions, small rooms, corners, etc.** Version with five posts adds extra leg room.
